Education

Fudan University

Sep. 2024 – Jun. 2028

B.S. in Computer Science

GPA: 3.95 / 4.00

Rank: 4 / 101

Honors: Achieved A+ (awarded to top < 10%) in two core courses:

Set Theory and Graph Theory and *Probability Theory and Mathematical Statistics*.

University of North Carolina at Chapel Hill

Aug. 2026 – Dec. 2026

Prospective Exchange Student

Research Experience

Big Data and Networking Group, Fudan University

Oct. 2025 – Present

- Investigated interaction patterns in decentralized social networks (e.g., Mastodon) by processing large-scale federated data with the FediLive framework.
- Developed network-based mathematical models to analyze multi-layer interaction structures across instances, supporting structural and behavioral analysis.
- Contributed to a collaborative research paper about decentralized governance mechanisms.

EasyGraph: Open-source Network Analysis Library

Jan. 2025 – Jun. 2025

- Systematically studied network science and graph analysis methods using the EasyGraph open-source framework.
- Gained hands-on experience with advanced algorithms, including structural hole spanner detection, network embedding, and centrality analysis.

AI Agent for Degree Thesis Submission & Consultation

Apr. 2025 – May 2025

- Designed a dual-agent LLM-based consultation system (student-facing & faculty-facing) to support degree thesis submission workflows.
- Built a Retrieval-Augmented Generation question answering pipeline.
- Deployed the system for real university administrative scenarios.

Awards

- Fudan University Undergraduate Scholarship, Third Prize Oct. 2025
- Fudan University AI Application Development Competition, Third Prize May 2025
- Fudan University Freshman Scholarship Sep. 2024

Technical Skills

Machine Learning: Familiar with PyTorch for implementing and experimenting with neural network models.

Programming: C, C++, Python, MATLAB, Verilog, L^AT_EX; object-oriented programming.

Languages: Mandarin (Native), English (Fluent; TOEFL 112: Speaking 28, Writing 28).
